## Human health risks and emissions from refineries and petrochemical plants

Wednesday  
April 17 2019  
4pm-5pm

CII Building  
1st Floor  
Irinis 95, 3041 Limassol

Cyprus  
University of  
Technology

Cyprus International Institute  
for Environmental and  
Public Health

The Cyprus International Institute for Environmental and Public Health of the Cyprus University of Technology invites you to the seminar on the following topic:

## **Human health risks and emissions from refineries and petrochemical plants**

### **Dr. Pietro Comba,**

*Istituto Superiore di Sanità, Ministry of Health, Italy*

Dr. Pietro Comba is the Head of the Unit of Environmental Epidemiology at the Italian National Institute of Health (Istituto Superiore di Sanità) and his research activities include epidemiologic studies of populations exposed to asbestos fibers, industrial carcinogens, toxic wastes and electromagnetic fields. Dr. Comba studied biological sciences at the University of Rome and later earned his doctoral degree at the University of Linköping, Sweden under the supervision of Prof. Olav Axelson. He is a world authoritative leader in the field of environmental epidemiology. He is a regular member in numerous scientific committees, such as in European Commission, IARC, WHO.

*Seminar is open to the public*
